

Accessible washroom · Hinged rail

Hinged support beside the toilet

Review the movement and fixing points of a hinged rail where side access beside the toilet is needed.

The setting

Check the 709-K rail in both lowered and raised positions, including clearance from doors, wall accessories and circulation.

Confirm fixings against the wall construction and have the project team review user needs, associated fittings and maintenance access together.

Planning points

01 Check product dimensions against the space.

02 Confirm plumbing or wall fixing conditions.

03 Allow room for everyday use and maintenance.
