

Home kitchen · Sink work area

Washing & preparation at home

Plan the sink within a continuous domestic worktop, starting with everyday cookware, draining and preparation routines.

The setting

When selecting the TAP3020 sink, review internal cabinet dimensions, the worktop opening and mounting method against the dimension drawing.

Allow working space beside the sink and room below for drainage and storage, keeping pipework clear of cabinet equipment.

Planning points

01 Check product dimensions against the space.

02 Confirm plumbing or wall fixing conditions.

03 Allow room for everyday use and maintenance.
