

Application illustration · Hotel guest rooms

Hotel Guest Bathroom

Coordinate towel storage with the flow and finishes of a guest bathroom.

The setting

A guest bathroom needs a clear place to reach for a towel and a layout that supports everyday room preparation. This illustration considers the towel warmer alongside wall finishes and nearby fittings, following the movement between washing and bathing areas.

HZ-RD15T is the related catalogue model. Review towel access for each room type and coordinate its position with nearby fittings and wall finishes. Check the electrical and fixing arrangements, then confirm the configuration, quantities and installation information as part of the room schedule.

Planning points

01 Review towel access and fittings for each room type.

02 Coordinate wall layouts and hardware finishes.

03 Confirm power, fixings and installation information.
