Selection & products

Compare straight, L shaped and hinged grab rails while preparing a clear installation brief.

01

Understand the users

Have the design team define user needs, approach directions and movement space around fittings.

02

Compare rail forms

Compare straight, L shaped and hinged rails against the layout, including left and right arrangements.

03

Verify fixing conditions

Before installation, have the project team verify the wall construction, fixings, positions and applicable requirements.

Products from the catalogue

702-L

L Shaped Stainless Steel Grab Rail

702

Straight Stainless Steel Grab Rail

709-K

Hinged Stainless Steel Grab Rail

A starting point for selection. Confirm configuration and supplied items when enquiring.

Your project brief

Bring these details together to make product selection, drawing review and quotation discussions more focused.

- [ ] User requirements: provide the design team's layout and approach directions.
- [ ] Rail schedule: list rail forms, left or right arrangements, models and quantities.
- [ ] Fixings: confirm wall construction, fixing proposals and installation positions.
- [ ] Project review: have the responsible team confirm applicable requirements and acceptance arrangements.
